

SOLAR POWERED MOON TOWN

biography

An eerie-beautiful synthpop fairytale,
a dark utopia,
an endless wanderer
following the sirens of the sea.

Like a witch, trapped in the real world, Solar Powered Moon Town
is dancing a strange dance on the fine line
between fiction and reality.

Her songs are dramatic, dazzling poems about modern love and
luxury problems in all their existential dimensions,
underlined with music, that feels a bit like a disturbing
mountain range of candy cane.
